Protection foils, bends and boxes in different shapes and sizes, ready to be installed on to the insulated pipes and other parts of the system, even where access is difficult, such as valves, flanges, gate valves, and so on.

Foils, pipes, bends, valve and flange cover boxes to be applied on the systems insulated parts to provide better protection and improved aesthetic appearance.

Accessories used to complete a professional installation.

Easy-to-use components to cut, fix and finish the insulation.

A range of specifically designed materials to solve sound-proofing problems in both residential and industrial installations. Suitable for applications in many fields ranging from automotive, music recording rooms, indoor leisure facilities, air conditioning and sanitation.

Insulated supports created to provide continuous insulation values where mechanical fixing is required.

For technical and sales information on the full range of K-FLEX ACCESSORIES, refer to the catalogue or price list.

INNOVATIVE APPLICATION SOLUTIONS
